

CLAIM AMENDMENTS

Claims 1-15 (cancelled).

Claim 16 (new): A taser holster, which comprises:

a carrier for detachably fastening on a user's body;

a pouch panel which is overlappedly provided on said carrier and defines a storage compartment, having a top opening, between said carrier and said pouch panel for receiving a taser in said storage compartment;

a shielding flap, having a predetermined size and shape, overlappedly extended from said carrier for selectively folding from a closed position to an opened position; and

a holding device comprising first hook and loop fasteners provided on an outer side of said pouch panel and an inner side of said shielding flap respectively to retain said shielding flap at said closed position and second hook and loop fasteners provided on said carrier and an outer side of said shielding flap respectively to retain said shielding flap at said open position, wherein in said closed position, said first hook fastener is detachably fastened with said first loop fastener to securely attach said shielding flap to said pouch panel to enclose said top opening of said storage compartment for covering a butt of said taser so as to securely retain said taser in said storage compartment, and at said opened position, said second fastener is detachably fastened with said second loop fastener to attach said shielding flap to said carrier for said taser being ready to quickly withdraw from said storage compartment without being interfered by said shielding flap.

Claim 17 (new): The taser holster, as recited in claim 16, wherein said pouch panel has a curved top edge gradually increasing a height to a mid-portion thereof, wherein said pouch panel is adapted for holding said taser in said storage compartment at a predetermined position for either a right-hand user or a left-hand user to quickly withdraw said taser.

Claim 18 (new): The taser holster, as recited in claim 16, wherein said carrier comprises a pad body that said pouch panel is overlapped thereon to form said storage

compartment between said pad body and said pouch panel, and a belt hanger upwardly extended from said pad body for detachably fastening on a waist position of said user.

Claim 19 (new): The taser holster, as recited in claim 17, wherein said carrier comprises a pad body that said pouch panel is overlapped thereon to form said storage compartment between said pad body and said pouch panel, and a belt hanger upwardly extended from said pad body for detachably fastening on a waist position of said user.

Claim 20 (new): The taser holster, as recited in claim 18, wherein said belt hanger comprises an elongated durable belt having an affixing end affixed to said pad body and a free end detachably fastened at a portion of said durable belt to form a hanging loop for a waist belt of said user passing therethrough.

Claim 21 (new): The taser holster, as recited in claim 19, wherein said belt hanger comprises an elongated durable belt having an affixing end affixed to said pad body and a free end detachably fastened at a portion of said durable belt to form a hanging loop for a waist belt of said user passing therethrough.

Claim 22 (new): The taser holster, as recited in claim 19, further comprising an attaching unit which comprises at least a fastening element provided on a rear side of said pad body for detachably attaching said pad body on a uniform of said user.

Claim 23 (new): The taser holster, as recited in claim 21, further comprising an attaching unit which comprises at least a fastening element provided on a rear side of said pad body for detachably attaching said pad body on a uniform of said user.

Claim 24 (new): The taser holster, as recited in claim 16, further comprising a securing unit which comprises first and second securing straps extended from said pouch panel and said shielding flap respectively, a buckle plug provided at a free end of said first securing strap, and a corresponding buckle socket provided at a free end of said second securing strap, wherein said buckle plug is detachably fastened with said buckle socket to securely lock up said shielding flap at said closed position for protecting said taser from close quarters grappling.

Claim 25 (new): The taser holster, as recited in claim 17, further comprising a securing unit which comprises first and second securing straps extended from said

pouch panel and said shielding flap respectively, a buckle plug provided at a free end of said first securing strap, and a corresponding buckle socket provided at a free end of said second securing strap, wherein said buckle plug is detachably fastened with said buckle socket to securely lock up said shielding flap at said closed position for protecting said taser from close quarters grappling.

Claim 26 (new): The taser holster, as recited in claim 19, further comprising a securing unit which comprises first and second securing straps extended from said pouch panel and said shielding flap respectively, a buckle plug provided at a free end of said first securing strap, and a corresponding buckle socket provided at a free end of said second securing strap, wherein said buckle plug is detachably fastened with said buckle socket to securely lock up said shielding flap at said closed position for protecting said taser from close quarters grappling.

Claim 27 (new): The taser holster, as recited in claim 21, further comprising a securing unit which comprises first and second securing straps extended from said pouch panel and said shielding flap respectively, a buckle plug provided at a free end of said first securing strap, and a corresponding buckle socket provided at a free end of said second securing strap, wherein said buckle plug is detachably fastened with said buckle socket to securely lock up said shielding flap at said closed position for protecting said taser from close quarters grappling.

Claim 28 (new): The taser holster, as recited in claim 23, further comprising a securing unit which comprises first and second securing straps extended from said pouch panel and said shielding flap respectively, a buckle plug provided at a free end of said first securing strap, and a corresponding buckle socket provided at a free end of said second securing strap, wherein said buckle plug is detachably fastened with said buckle socket to securely lock up said shielding flap at said closed position for protecting said taser from close quarters grappling.

Claim 29 (new): The taser holster, as recited in claim 19, further comprising a pocket flap overlapped between said pouch panel and said pad body to form a patch pocket, having a top open, provided in said storage compartment for placing accessories.

Claim 30 (new): The taser holster, as recited in claim 23, further comprising a pocket flap overlapped between said pouch panel and said pad body to form a patch pocket, having a top open, provided in said storage compartment for placing accessories.

Claim 31 (new): The taser holster, as recited in claim 26, further comprising a pocket flap overlapped between said pouch panel and said pad body to form a patch pocket, having a top open, provided in said storage compartment for placing accessories.

Claim 32 (new): The taser holster, as recited in claim 28, further comprising a pocket flap overlapped between said pouch panel and said pad body to form a patch pocket, having a top open, provided in said storage compartment for placing accessories.
